

# GitHub Markdown Writeup

2019年12月8日 11:13

## Text

1. **\*\*bold\*\*=bold**;
  - `__bold__` is also fine;
2. *\*italic\*=italic*;
  - `_italic_` is also fine;
  - But you cannot combine bold and italic in one line;
3. [link to Google](http://google.com)=link address.
4. Also `<del>tags</del>` supported.
  - Alternatively, `~~this~~` can also appears strikethrough.

## Lists

1. Numbered for ordered lists: 1. 2. 3.;
2. Bullet points for unordered lists: \* \* \*;
  - Alternative: - - -;
    - Dashes work just as well
    - And if you have sub points, put two spaces before the dash or star:
      - Like this
      - And this

## Images

1. Format: `![Image of Something](https://address/something.png)`

## Headers & Quotes

1. Use '#' to indicate `<h1>` or `<h2>`, etc.;
2. Use ``something`` to highlight something;
3. Use `>` before the line to quote something.

## Code

1. Simply use ``code`` is ok for single line code;
2. Use ````language\n code\n ```` to present multiple line code.

```
```javascript
if (isAwesome){
    return true
}
```
```

## Extras

1. Link to people use '@' character;
2. Task lists - `[x]` for complete and `[ ]` for incomplete.
  - `[x]` This is a complete item
  - `[ ]` This is an incomplete item

## Tables

1. Use `'-'` and `'|'` to create tables!

```
First Header	Second Header
Content from cell 1 | Content from cell 2
Content in the first column | Content in the second column
```

## SHA references

1. Reference to a commit's SHA-1 hash will be converted to the link to that commit on GitHub;
2. Issue references also ok.

```
#1
mojombo#1
mojombo/github-flavored-markdown#1
```
